### Independent Auditor's Report

To the Board of Education

Montcalm Area Intermediate School District

We have audited the accompanying financial statements of the governmental activities, each major fund, and the aggregate remaining fund information of Montcalm Area Intermediate School District as of and for the year ended June 30, 2008, which collectively comprise the School District's basic financial statements as listed in the table of contents. These basic financial statements are the responsibility of Montcalm Area Intermediate School District's management. Our responsibility is to express opinions on these basic financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the basic financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the basic financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall basic financial statement presentation. We believe that our audit provides a reasonable basis for our opinions.

In our opinion, the basic financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, each major fund, and the aggregate remaining fund information of Montcalm Area Intermediate School District as of June 30, 2008 and the respective changes in financial position for the year then ended, in conformity with accounting principles generally accepted in the United States of America.

The management's discussion and analysis information and budgetary comparison schedules, as identified in the table of contents, are not required parts of the basic financial statements but are supplemental information required by the Governmental Accounting Standards Board. We have applied certain limited procedures, which consisted principally of inquiries of management, regarding the methods of measurement and presentation of the required supplemental information. However, we did not audit the information and express no opinion on it.

To the Board of Education

Montcalm Area Intermediate School District

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise Montcalm Area Intermediate School District's basic financial statements. The accompanying other supplemental information, as identified in the table of contents, is presented for the purpose of additional analysis and is not a required part of the basic financial statements. The other supplemental information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

In accordance with Government Auditing Standards, we have also issued a report under separate cover dated August 11, 2008 on our consideration of the School District's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, grant agreements, and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide opinions on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with Government Auditing Standards and should be considered in assessing the results of our audit.

Plante & Moran, PLLC

August 11, 2008

### **Management's Discussion and Analysis**

This section of Montcalm Area Intermediate School District's (the "District") annual financial report presents our discussion and analysis of the District's financial performance during the year ended June 30, 2008. Please read it in conjunction with the District's basic financial statements, which immediately follow this section.

### **Using this Annual Report**

This annual report consists of a series of financial statements and notes to those statements. These statements are organized so the reader can understand Montcalm Area Intermediate School District financially as a whole. The district-wide financial statements provide information about the activities of the whole District, presenting both an aggregate view of the District's finances and a longer-term view of those finances. The fund financial statements provide the next level of detail. For governmental activities, these statements tell how services were financed in the short term as well as what remains for future spending. The fund financial statements look at the District's operations in more detail than the district-wide financial statements by providing information about the District's most significant funds - the General Fund, the Special Education Fund, and the Vocational Education Fund - with all other funds presented in one column as nonmajor funds.

The format of the financial report is as follows:

Management's Discussion and Analysis (MD&A) (Required Supplemental Information)

**Basic Financial Statements** 

District-wide Financial Statements

**Fund Financial Statements** 

Notes to the Basic Financial Statements

(Required Supplemental Information)
Budgetary Information for Major Funds

Other Supplemental Information

### **Management's Discussion and Analysis (Continued)**

### Reporting the District as a Whole - District-wide Financial Statements

One of the most important questions asked about the District is, "As a whole, what is the District's financial condition as a result of the year's activities?" The statement of net assets and the statement of activities, which appear first in the District's basic financial statements, report information on the District as a whole and its activities in a way that helps you answer this question. We prepare these statements to include all assets and liabilities, using the accrual basis of accounting, which is similar to the accounting used by most private sector companies. All of the current year's revenues and expenses are taken into account regardless of when cash is received or paid.

These two statements report the District's net assets - the difference between assets and liabilities, as reported in the statement of net assets - as one way to measure the District's financial health or financial position. Over time, increases or decreases in the District's net assets - as reported in the statement of activities - are indicators of whether its financial health is improving or deteriorating. The relationship between revenues and expenses is the District's operating results. However, the District's goal is to provide services to local public school districts, teachers, and students, not to generate profits as commercial entities do. One must consider many other nonfinancial factors, such as the quality of the services provided and the success in meeting the needs of constituent school districts, to assess the overall health of the District.

The statement of net assets and the statement of activities report the governmental activities for the District, which encompass all of the District's services. State aid and state and federal grants finance most of these activities.

### Reporting the District's Most Significant Funds - Fund Financial Statements

The District's fund financial statements provide detailed information about the most significant funds - not the District as a whole. Some funds are required to be established by state law and by bond covenants. However, the District establishes many other funds to help it control and manage money for particular purposes or to show that it is meeting legal responsibilities for using certain taxes, grants, and other money (such as voter-approved special education funding and state and federal grants). The governmental funds of the District use the following accounting approach:

**Governmental Funds** - All of the District's services are reported in governmental funds. Governmental fund reporting focuses on showing how money flows into and out of funds and the balances left at year end that are available for spending. They are reported using an accounting method called modified accrual accounting, which measures cash and all other financial assets that can readily be converted to cash. The governmental fund statements provide a detailed short-term view of the operations of the District and the services it provides.

### **Management's Discussion and Analysis (Continued)**

### Reporting the District's Most Significant Funds - Fund Financial Statements (Continued)

Governmental fund information helps you determine whether there are more or fewer financial resources that can be spent in the near future to finance the District's programs. We describe the relationship (or differences) between governmental activities (reported in the statement of net assets and the statement of activities) and governmental funds in a reconciliation.

### The District as a Whole

The statement of net assets provides the perspective of the District as a whole. Table I provides a summary of the District's net assets as of June 30, 2008 and 2007:

| TABLE I                                     | Governmental Activ |        |      |        |  |  |  |  |  |  |

## **Management's Discussion and Analysis (Continued)**

### The District as a Whole (Continued)

The District's net assets were approximately \$11.5 million at June 30, 2008. Capital assets totaling approximately \$5.4 million, net of related debt, compares the original cost, less depreciation of the District's capital assets, to long-term debt used to finance the acquisition of those assets. The debt will be repaid from state aid designated for that purpose as the debt service comes due. Restricted net assets are reported separately to show enabling legislation that limits the District's ability to use those net assets for day-to-day operations. The remaining amount of net assets (approximately \$1.0 million) was unrestricted.

The \$1.0 million in unrestricted net assets of governmental activities represents the accumulated results of all past years' operations. The unrestricted net asset balance enables the District to meet working capital and cash flow requirements as well as to provide for future uncertainties.

The results of this year's operations for the District as a whole are reported in the statement of activities (see Table 2), which shows the changes in net assets for the fiscal years ended June 30, 2008 and 2007.

| TABLE 2                           | Governmental Activities |         |        |           |  |
|-----------------------------------|-------------------------|---------|--------|-----------|--|
|                                   | Year Ended June 30      |         |        |           |  |
|                                   |                         | 2008    |        | 2007      |  |

| (Decrease) Increase in Net Assets | \$                      | (279)   | \$     | 394       |  |

### **Management's Discussion and Analysis (Continued)**

### The District as a Whole (Continued)

As reported in the statement of activities, the cost of all of our governmental activities this year was approximately \$18.2 million. Certain activities were partially funded from those who benefited from the programs (\$.1 million) or by other governments and organizations that subsidized certain programs with grants and contributions (\$7.9 million). We paid for the remaining "public benefit" portion of our governmental activities with \$6.6 million in taxes, \$3.1 million in state aid, and with our other revenues, i.e., interest and general entitlements.

The District experienced a decrease in net assets of approximately \$279,000. Key reasons for the change in net assets were:

- A Special Education Fund equity payment to LEAs for operation of local special education programs
- Parking lot improvements, lot lighting enhancements, and building improvements
- Central Services fingerprinting mandate by State Department of Education
- Unemployment costs (i.e. THPP personnel)
- Increased instructional/added needs staff and associated para educators due to increased staffing and addition of MOCI classrooms, and supervisory staff
- Significant cost of bus diesel fuel

As discussed above, the net cost shows the financial burden that was once again placed on the State and the District's taxpayers by each of these functions. Since property taxes for operations and unrestricted state aid constitute the vast majority of District operating revenue sources, the Board of Education and administration must annually evaluate the needs of the District and balance those needs with this revenue.

### **The District's Funds**

As we noted earlier, the District uses funds to help it control and manage money for particular purposes. Looking at funds helps the reader consider whether the District is being accountable for the resources taxpayers and others provide to it and may provide more insight into the District's overall financial health.

As the District completed this year, the governmental funds reported a combined fund balance of \$6.3 million, which is an increase of approximately \$22,700 from last year. The primary reasons for the increase are as follows:

- Utilization of H.O. Steele Facility by Montcalm Community College
- Sale of MACC Construction Trades Home
- Programmatic changes resulting in reduced expenditures (due to shortage areas, i.e., speech and Director of Instructions, etc.)

### **Management's Discussion and Analysis (Continued)**

### Major Governmental Fund Budgetary Highlights

Over the course of the year, the District revises its budget as it attempts to deal with unexpected changes in revenues and expenditures. The final amendment to the budget was adopted just before year end. State law requires that the budget be amended to ensure that expenditures do not exceed appropriations. A schedule showing the District's original and final budget amounts compared with amounts actually paid and received is provided in the required supplemental information section of these basic financial statements.

The District increased total budgeted revenues in the General, Special Education, and Vocational Education Funds, and overall revenues decreased in the School Lunch Fund.

There were revisions made to the General Fund original budget. Budgeted revenues were increased mainly due to an increase in anticipated state revenue sources and carryover in federal Title II D funds, and a slight increase in local revenues.

There were revisions made to the Special Education Fund original budget due to an increase in taxes, state revenues, federal revenues, Medicaid, and incoming transfers.

There were revisions made to the Vocational Education Fund budget due to tax and local revenues and incoming transfers mainly from the sale of construction trade homes.

Overall, food revenues were decreased; however, there was an increase in federal sources, but a decrease in local sources and incoming transfers.

There were no significant variances between final budget amounts and actual.

### **Capital Assets and Debt Administration**

#### Capital Assets

At June 30, 2008, the District had a net of \$6.1 million invested in a broad range of capital assets, including land, buildings, furniture, and equipment. This amount represents a net decrease (including additions, deductions, and depreciation) of \$291,277, or 4 percent, from last year.

|                                     | 2008      |            |    | 2007       |  |
|-------------------------------------|-----------|------------|----|------------|--|
| Land                                | \$        | 114,950    | \$ | 114,950    |  |
| Buildings and building improvements |           | 8,688,787  |    | 8,506,989  |  |
| Buses and other vehicles            |           | 2,377,811  |    | 2,217,355  |  |
| Furniture and equipment             |           | 1,967,349  |    | 1,811,203  |  |
| Total capital assets                | <u>\$</u> | 13,148,897 | \$ | 12,650,497 |  |

This year's additions of \$516,038 included two new buses. No new debt was issued for these additions.

### **Management's Discussion and Analysis (Continued)**

### Debt

At the end of this year, the District had \$710,301 in Durant Non-Plaintiff Bonds outstanding. Bond payments are due annually through the year 2013. The resources used to extinguish this debt are derived from restricted state aid allocated specifically for that purpose.

Other obligations are made up of accrued compensated absences. We present more detailed information about our long-term liabilities in the notes to financial statements.

### **Economic Factors and Next Year's Budgets and Rates**

Our elected officials and administration consider many factors when setting the District's budget. One of the most important factors affecting the operating budget is state aid provided to intermediate school districts. Under state law, the District cannot assess additional property tax revenue for general operations. As a result, the District's funding is heavily dependent on the State's ability to fund the District's operations. Based on the current State Aid Act, we anticipate no significant change in state aid funds for operating purposes in the coming fiscal year.

Since the District's operating revenue is heavily dependent on state funding and the health of the State's School Aid Fund, the actual revenue received depends on the State's ability to collect revenues to fund its appropriation to public school districts, intermediate school districts, and regional educational service agencies.

#### **Subsequent Events**

The District has borrowed \$1,250,000 on state aid anticipation notes for general and special education purposes.

### Statement of Net Assets June 30, 2008

|  | Governmental Activities |
|--|-------------------------|
| Assets   |                         |
| Cash and cash equivalents (Note 3)                         | \$ 6,816,388            |

Governmental Funds
Reconciliation of the Statement of Revenue, Expenditures,
and Changes in Fund Balances of Governmental Funds
to the Statement of Activities
Year Ended June 30, 2008

Net Change in Fund Balances - Total governmental funds

\$ 22,707

Amounts reported for governmental activities in the statement of activities are different because:

Governmental funds report capital outlay as expenditures; in the statement of activities, these costs are allocated over their estimated useful lives as depreciation:

Depreciation expense
Capitalized capital outlay

\$ (807,315) 516,038 (29

(291,277)

Compensated absences are recorded when earned in the statement of activities. In the current year, more was earned than paid out

(10,643)

**Change in Net Assets of Governmental Activities** 

\$ (279,213)

Notes to Financial Statements June 30, 2008

### **Note I - Summary of Significant Accounting Policies**

The accounting policies of Montcalm Area Intermediate School District (the "School District") conform to accounting principles generally accepted in the United States of America (GAAP) as applicable to governmental units. The following is a summary of the significant accounting policies used by the School District:

### **Reporting Entity**

The School District is governed by an elected five-member Board of Education. The accompanying basic financial statements have been prepared in accordance with criteria established by the Governmental Accounting Standards Board for determining the various governmental organizations to be included in the reporting entity. These criteria include significant operational financial relationships that determine which of the governmental organizations are a part of the School District's reporting entity, and which organizations are legally separate component units of the School District. Based on the application of the criteria, the School District does not contain any component units.

### **District-wide and Fund Financial Statements**

The district-wide financial statements (i.e., the statement of net assets and the statement of activities) report information on all of the nonfiduciary activities of the primary government. For the most part, the effect of interfund activity has been removed from these statements. Governmental activities, which normally are supported by taxes and intergovernmental revenues, are reported separately from business-type activities, which rely to a significant extent on fees and charges for support. All of the School District's district-wide activities are considered governmental activities.

The statement of activities demonstrates the degree to which the direct expenses of a given function or segment are offset by program revenues. Direct expenses are those that are clearly identifiable with a specific function. Program revenue includes (I) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function and (2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function. Taxes, intergovernmental payments, and other items not properly included among program revenues are reported instead as general revenue.

Separate financial statements are provided for governmental funds. Major individual governmental funds are reported as separate columns in the fund financial statements.

Notes to Financial Statements June 30, 2008

### Note I - Summary of Significant Accounting Policies (Continued)

## Measurement Focus, Basis of Accounting, and Financial Statement Presentation

**District-wide Financial Statements** - The district-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. Revenue is recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized as revenue in the year for which they are levied. Grants, categorical aid, and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

As a general rule, the effect of interfund activity has been eliminated from the districtwide financial statements.

Amounts reported as program revenue include (1) charges to customers or applicants for goods, services, or privileges provided and (2) operating grants and contributions. Internally dedicated resources are reported as general revenue rather than as program revenue. Likewise, general revenue includes all taxes and unrestricted state aid.

**Fund Financial Statements** - Governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenue is recognized as soon as it is both measurable and available. Revenue is considered to be available if it is collected within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the School District considers revenues to be available if they are collected within 60 days of the end of the current fiscal period. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, expenditures related to compensated absences and claims and judgments are recorded only when payment is due.

Property taxes, unrestricted state aid, intergovernmental grants, and interest associated with the current fiscal period are all considered to be susceptible to accrual and so have been recognized as revenue of the current fiscal period. All other revenue items are considered to be available only when cash is received by the School District.

The School District reports the following major governmental funds:

**General Fund** - The General Fund is the School District's primary operating fund. It accounts for all financial resources of the School District, except those required to be accounted for in another fund.

**Special Education Fund** - The Special Education Fund is used to account for all financial resources relating to the operation of special education programs of the School District.

Notes to Financial Statements June 30, 2008

### **Note I - Summary of Significant Accounting Policies (Continued)**

**Vocational Education Fund** - The Vocational Education Fund is used to account for all financial resources relating to the operation of the vocational and technical programs of the School District.

Additionally, the School District reports the following fund types:

**Special Revenue Fund** - The Special Revenue Fund is used to account for the proceeds of specific revenue sources that are restricted to expenditure for specified purposes. The School District's Special Revenue Fund is the School Lunch Fund. Any operating deficit generated by this activity is the responsibility of the General Fund.

**Capital Projects Fund** - The Capital Projects Fund is used to record bond proceeds or other revenue and the disbursement of monies specifically designed for acquiring new school sites, buildings, equipment, and for major remodeling and repairs. The fund is retained until the purpose for which the fund was created has been accomplished.

**Debt Service Fund** - The Debt Service Fund is used to record specific revenue sources and the payment of interest, principal, and other expenditures on long-term debt. The School District's Debt Service Fund is the Durant Fund.

### Assets, Liabilities, and Net Assets or Equity

**Cash and Cash Equivalents** - Cash and cash equivalents include cash on hand, demand deposits, and short-term investments with a maturity of three months or less when acquired. To the extent that cash from various funds has been pooled, relative interest income is allocated to each fund based on relative participation in the pool.

**Receivables and Payables** - In general, outstanding balances between funds are reported as "due to/from other funds." Property tax and other trade receivables are shown net of an allowance for uncollectible amounts. The School District considers all receivables to be fully collectible; accordingly, no allowance for uncollectible amounts is recorded.

Property taxes are assessed as of December 31 and the related property taxes become a lien on December 1 of the following year. These taxes are due on February 14 with the final collection date of February 28 before they are added to the county tax rolls.

**Inventories and Prepaid Costs** - Inventories are valued at cost, on a first-in, first-out basis. Inventories of governmental funds are recorded as expenditures when consumed rather than when purchased. Certain payments to vendors reflect costs applicable to future fiscal years and are recorded as prepaid costs in both district-wide and fund financial statements.

### Notes to Financial Statements June 30, 2008

### Note I - Summary of Significant Accounting Policies (Continued)

Capital Assets - Capital assets, which include land, buildings, equipment, and vehicles, are reported in the governmental column in the district-wide financial statements. Capital assets are defined by the School District as assets with an initial individual cost of more than \$5,000 and an estimated useful life in excess of five years. Such assets are recorded at historical cost or estimated historical cost if purchased or constructed. Donated capital assets are recorded at estimated fair market value at the date of donation. Costs of normal repair and maintenance that do not add to the value or materially extend asset life are not capitalized. The School District does not have infrastructure-type assets.

Buildings, equipment, and vehicles are depreciated using the straight-line method over the following useful lives:

| Buildings and building improvements | 20-50 years |
|-------------------------------------|-------------|
| Buses and other vehicles            | 7-8 years   |
| Furniture and equipment             | 5-20 years  |

**Compensated Absences** - The liability for compensated absences reported in the district-wide financial statements consists of earned but unused accumulated sick leave benefits. A liability for these amounts is reported in governmental funds as it comes due for payment. The liability has been calculated using the vesting method, in which leave amounts for both employees who are currently eligible to receive termination payments at normal retirement age and other employees who are expected to become eligible in the future to receive such payments upon normal retirement are included.

**Long-term Obligations** - In the district-wide financial statements, long-term debt and other long-term obligations are reported as liabilities in the statement of net assets.

**Fund Equity** - In the fund financial statements, governmental funds report reservations of fund balance for amounts that are not available for appropriation or are legally restricted by outside parties for use for a specific purpose. Designations of fund balance represent tentative management plans that are subject to change.

**Comparative Data** - Comparative data is not included in the School District's basic financial statements.

Notes to Financial Statements June 30, 2008

### Note 2 - Stewardship, Compliance, and Accountability

**Budgetary Information** - Annual budgets are adopted on a basis consistent with accounting principles generally accepted in the United States of America and state law for the General Fund, Special Education, Vocational Education, and Food Services Funds.

The budget document presents information by fund and function. The legal level of budgetary control adopted by the governing body (i.e., the level at which expenditures may not legally exceed appropriations) is the function level. State law requires the School District to have its budget in place by July I. Expenditures in excess of amounts budgeted are a violation of Michigan law. State law permits districts to amend their budgets during the year. During the year, the budget was amended in a legally permissible manner. There were no significant amendments during the year.

Unexpended appropriations lapse at year end; encumbrances are not included as expenditures.

**Excess of Expenditures Over Appropriations in Budgeted Funds** - The School District did not have significant expenditure budget variances.

### Note 3 - Cash and Cash Equivalents

State statutes authorize the School District to make deposits in the accounts of federally insured banks, credit unions, and savings and loan associations that have offices in Michigan. The School District is allowed to invest in U.S. Treasury or agency obligations, U.S. government repurchase agreements, bankers' acceptances, commercial paper rated prime at the time of purchase that matures not more than 270 days after the date of purchase, mutual funds, and investment pools that are composed of authorized investment vehicles. The School District's deposits are in accordance with statutory authority.

The School District has designated two banks for the deposit of its funds.

The investment policy adopted by the board has authorized investments as listed in the state statutory authority as listed above.

Notes to Financial Statements
June 30, 2008

### Note 3 - Cash and Cash Equivalents (Continued)

The School District's cash and investments are subject to custodial credit risk as follows:

### **Custodial Credit Risk of Bank Deposits**

Custodial credit risk is the risk that in the event of a bank failure, the School District's deposits may not be returned to it. The School District's investment policy requires that financial institutions be evaluated and only those with an acceptable risk level are used for the School District's deposits for custodial credit risk. At year end, the School District's deposit balance of \$7,453,524 had \$7,253,524 of bank deposits (certificates of deposit, checking, and savings accounts) that were uninsured and uncollateralized. The School District believes that due to the dollar amounts of cash deposits and the limits of FDIC insurance, it is impractical to insure all deposits. As a result, the School District evaluates each financial institution with which it deposits funds and assesses the level of risk of each institution; only those institutions with an acceptable estimated risk level are used as depositories.

The School District has no investments at year end.

### Note 4 - Receivables

Receivables as of year end for the School District's individual major funds are as follows:

|                               | General                    | Special<br>Education    | Vocational<br>Education |                       |
|-------------------------------|----------------------------|-------------------------|-------------------------|-----------------------|
|                               | Fund                       | Fund                    | Fund                    | Total                 |
| Receivables:                  |                            |                         |                         |                       |
| Accounts<br>Intergovernmental | \$ 1,759<br><u>301,412</u> | \$ 71<br><u>956,803</u> | \$ 8,140<br>205,467     | \$ 9,970<br>1,463,682 |
| Total                         | \$ 303,171                 | \$ 956,874              | \$ 213,607              | <b>\$ 1,473,652</b>   |

Governmental funds report deferred revenue in connection with receivable for revenue that is not considered to be available to liquidate liabilities of the current period. Governmental funds also defer revenue recognition in connection with resources that have been received but not yet earned. At the end of the current fiscal year, deferred revenue consists of grant and categorical aid payments received prior to meeting all eligibility requirements totaling \$3,449.

### Notes to Financial Statements June 30, 2008

### **Note 5 - Capital Assets**

Capital asset activity of the School District's governmental activities was as follows:

|  | Balance |            |    | ditions and | _  |           | Balance |             |

Notes to Financial Statements June 30, 2008

### Note 7 - Long-term Obligations (Continued)

**Durant Non-Plaintiff Bond** - Included in governmental activities general obligation bonds is the Durant Non-Plaintiff Bond. Annual total payments (principal and interest) of \$905,470 associated with this bond are funded by the State of Michigan via specifically appropriated state aid and will not require any School District debt levy or utilization of any other School District financial resources. The Durant Non-Plaintiff Bond is comprised of the following issue:

\$1,202,953 School Improvement Bond, Series 1998, due in annual principal installments ranging from \$66,948 to \$419,115 through May 15, 2013, interest at 4.76 percent.

### **Note 8 - Risk Management**

The School District is exposed to various risks of loss related to property loss, torts, errors and omissions, employee injuries (workers' compensation), as well as medical benefits provided to employees. The School District has purchased commercial insurance for general liability, workers' compensation, and employee health insurance claims. Settled claims relating to the commercial insurance have not exceeded the amount of insurance coverage in any of the past three fiscal years.

### **Note 9 - Defined Benefit Pension Plan**

**Plan Description** - The School District participates in the Michigan Public School Employees' Retirement System (MPSERS), a statewide, cost-sharing, multiple-employer defined benefit public employee retirement system governed by the State of Michigan that covers substantially all employees of the School District. The system provides retirement, survivor, and disability benefits to plan members and their beneficiaries. The system also provides postemployment healthcare benefits to retirees and beneficiaries who elect to receive those benefits.

The Michigan Public School Employees' Retirement System issues a publicly available financial report that includes financial statements and required supplementary information for the pension and postemployment healthcare plans. That report is available on the web at <a href="http://www.michigan.gov/orsschools">http://www.michigan.gov/orsschools</a>, or by writing to the Office of Retirement System at 7150 Harris Drive, P.O. Box 30171, Lansing, MI 48909.

Notes to Financial Statements
June 30, 2008

### Note 9 - Defined Benefit Pension Plan (Continued)

**Pension Benefits** - Employer contributions to the pension system result from the implementing effects of the School Finance Reform Act. Under these procedures, each school district is required to contribute the full actuarial funding contribution amount to fund pension benefits. The employer contribution rate was 11.19 percent of covered payroll for the period from July 1, 2007 through September 30, 2007 and 10.17 percent for the period from October 1, 2007 through June 30, 2008. Basic plan members make no contributions, but member investment plan members contribute at rates ranging from 3 percent to 4.3 percent of gross wages. The School District's required and actual contributions to the plan for the years ended June 30, 2008, 2007, and 2006 were \$855,793, \$850,696, and \$796,544, respectively.

**Postemployment Benefits** - Under the MPSERS Act, all retirees participating in the MPSERS pension plan have the option of continuing health, dental, and vision coverage through MPSERS. Retirees electing this coverage contribute an amount equivalent to the monthly cost for Part B Medicare and 10 percent of the monthly premium amount for the health, dental, and vision coverage at the time of receiving the benefits. The MPSERS board of trustees annually sets the employer contribution rate to fund the benefits on a pay-as-you-go basis. Participating employers are required to contribute at that rate. The employer contribution rate was 6.55 percent of covered payroll for the period from July 1, 2007 through September 30, 2007 and 6.55 percent for the period from October 1, 2007 through June 30, 2008. The School District's required and actual contributions to the plan for retiree healthcare benefits for the years ended June 30, 2008, 2007, and 2006 were \$537,693, \$514,028, and \$553,714, respectively.

### **Note 10 - State Aid Anticipation Note**

On August 20, 2007, the Montcalm Area Intermediate School District borrowed \$1,000,000 on a state aid anticipation note for special education purposes. The note bears interest at 3.68 percent and is due August 20, 2008. At June 30, 2008, the School District has accrued interest of \$36,800 on this note.

### **Note II - Subsequent Event**

In August 2008, the Montcalm Area Intermediate School District borrowed \$1,000,000 and \$250,000 on a state aid anticipation note for special education purposes and a general education state aid note. Each note, plus interest, is due in August 2009.
